

Seashell Royal School Willmott Dixon | Manchester

Seashell Royal School Manchester is a special needs school, offering outstanding education and care for students aged 2-19.

Brief: Royal Manchester School needed the whole package: cubicles, IPS ducting, lockers and benching for WCs and changing rooms.

Solution: TBS Amwell Splash cubicles were the perfect choice providing the WC areas and the changing rooms with durable, water-resistant cubicles. The PDQ Panel & Frame system was chosen to complement the Splash cubicles. Aquasafe lockers and Aquabench system were provided for the changing rooms, all manufactured in impact and water-resistant SGL.

Splash cubicles:

- Made of impact and water-resistant Solid Grade Laminate, these cubicles withstand the test of time
- The cubicle exterior is kept free of fixings and offers machined and polished edges to all panels giving it a unique finish.

Aquasafe lockers and Aquabench seating:

- Hard-wearing and water-resistant Solid Grade Laminate carcass and doors with various lock, size and configuration options
- Delivering durable changing room benches and a practical seating solution, Aquabench offers a choice of flexible styles and seating options.

PDQ Panel & Frame:

- Arrives on site pre-assembled for easy installation, reducing labour time and costs by 50% compared to a traditional timber frame
- Various panel splits available to suit WCs, urinals and WHBs
- If supplied in SGL, the panels are fully water and impact-resistant, and for extra safety, optional anti-vandal locks are available.
