

Brentford Football Club Buckingham Group | London

Brentford Football Club's new stadium is one of the most significant and exciting developments in the history of the club.

Brief: For their new stadium, Brentford FC required a washroom cubicle system that was not only visually appealing but also durable and resilient.

Solution: TBS Amwell Evolution cubicles were the perfect fit alongside PDQ Panel & Frame and PDQ Vanity & Frame, all designed to withstand high-traffic areas while promoting easy maintenance. The club benefited from a comprehensive, stylish and practical washroom solution.

Evolution cubicles:

- The headrail and pilasters, manufactured from Satin Anodised Aluminium make evolution extremely tough and durable
- Supplied in SGL- water and impact-resistant material for long-lasting performance.

PDQ Vanity & Frame:

- The vanities were supplied in SGL for extra durability and resistance to water
- 90% quicker to install compared to a traditional timber system.

PDQ Panel & Frame:

- Arrives on-site pre-assembled for easy installation, cutting labour time and costs by 50% compared to a traditional timber frame.
- Various panel splits available to suit WCs, urinals and WHBs
- If supplied in SGL, the panels are fully water and impact-resistant, and for extra safety, optional anti-vandal locks are available.
